
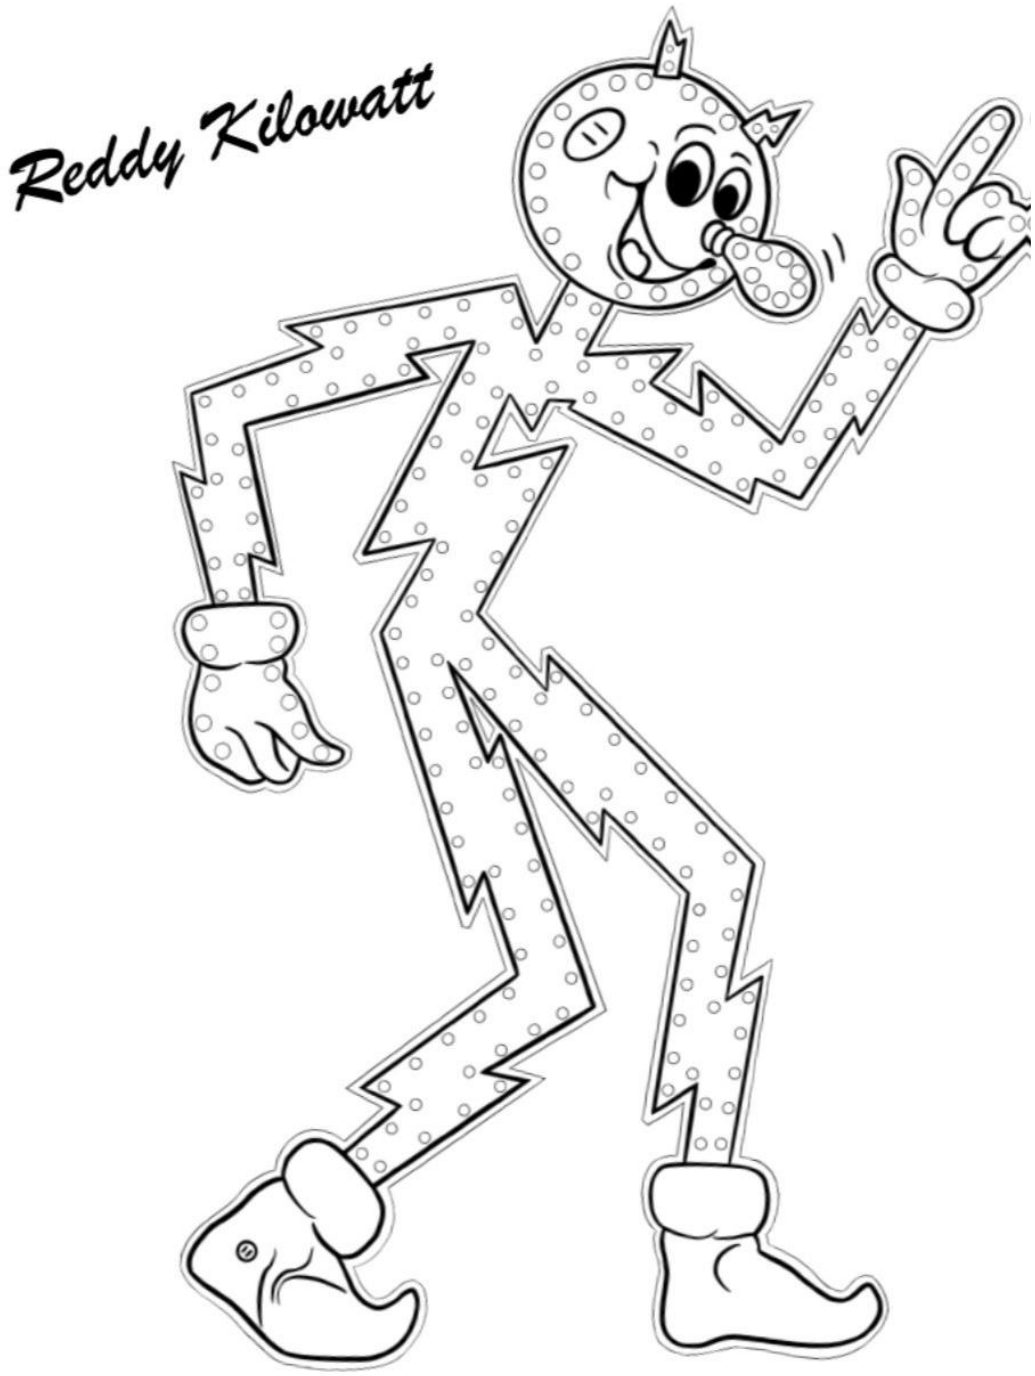
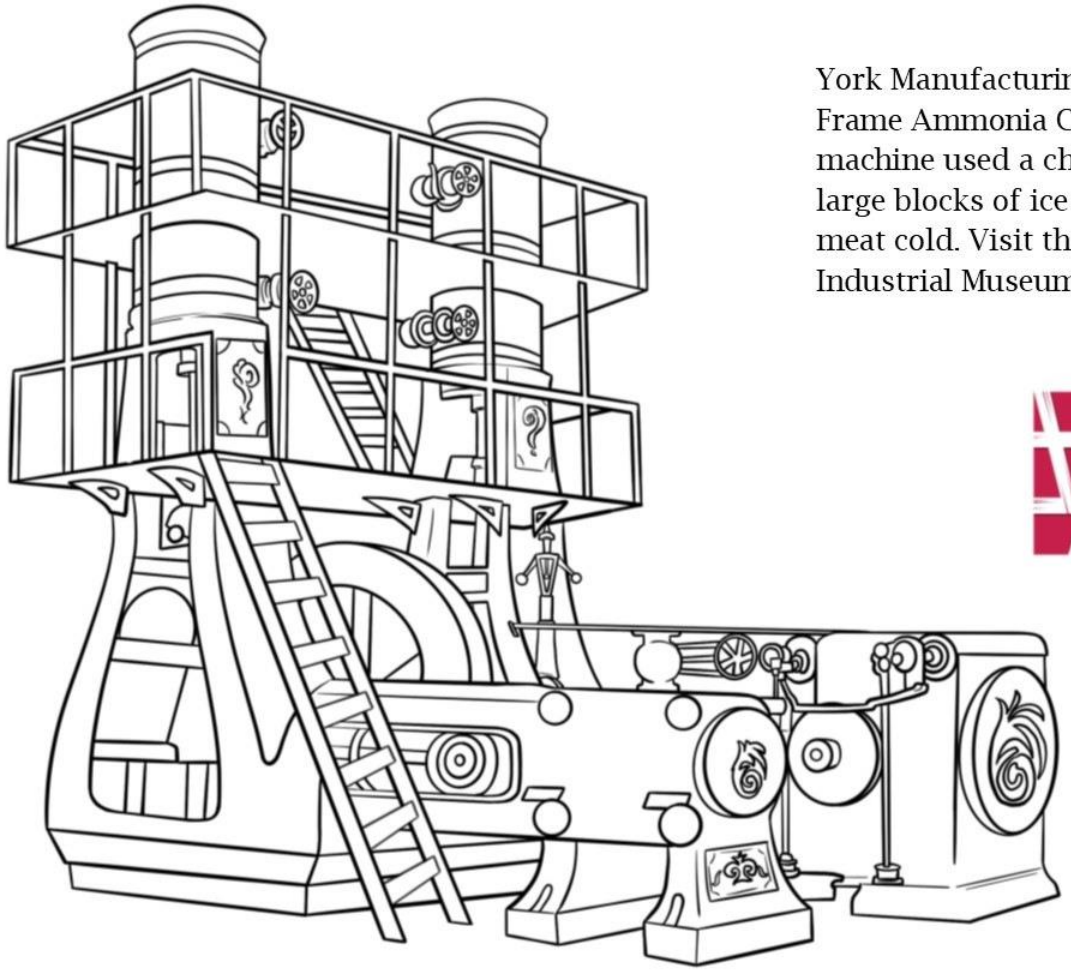
1916 Pullman Deluxe Coupe (Opera Car)

The Deluxe Coupe (Opera Car) was specially made for women. With its push button start and sleek design, it was built to be easier and more manageable to drive for "milady". The Deluxe Coupe also offered an enclosed area for the driver and riders to reside in either in a two-person seating arrangement or a three-person seating arrangement as seen within our artifact on display at the Agricultural and Industrial Museum. The Deluxe Coupe was built for class and yet was only $990 compared the more expensive vehicles which were in the thousand-dollar range during this time period.

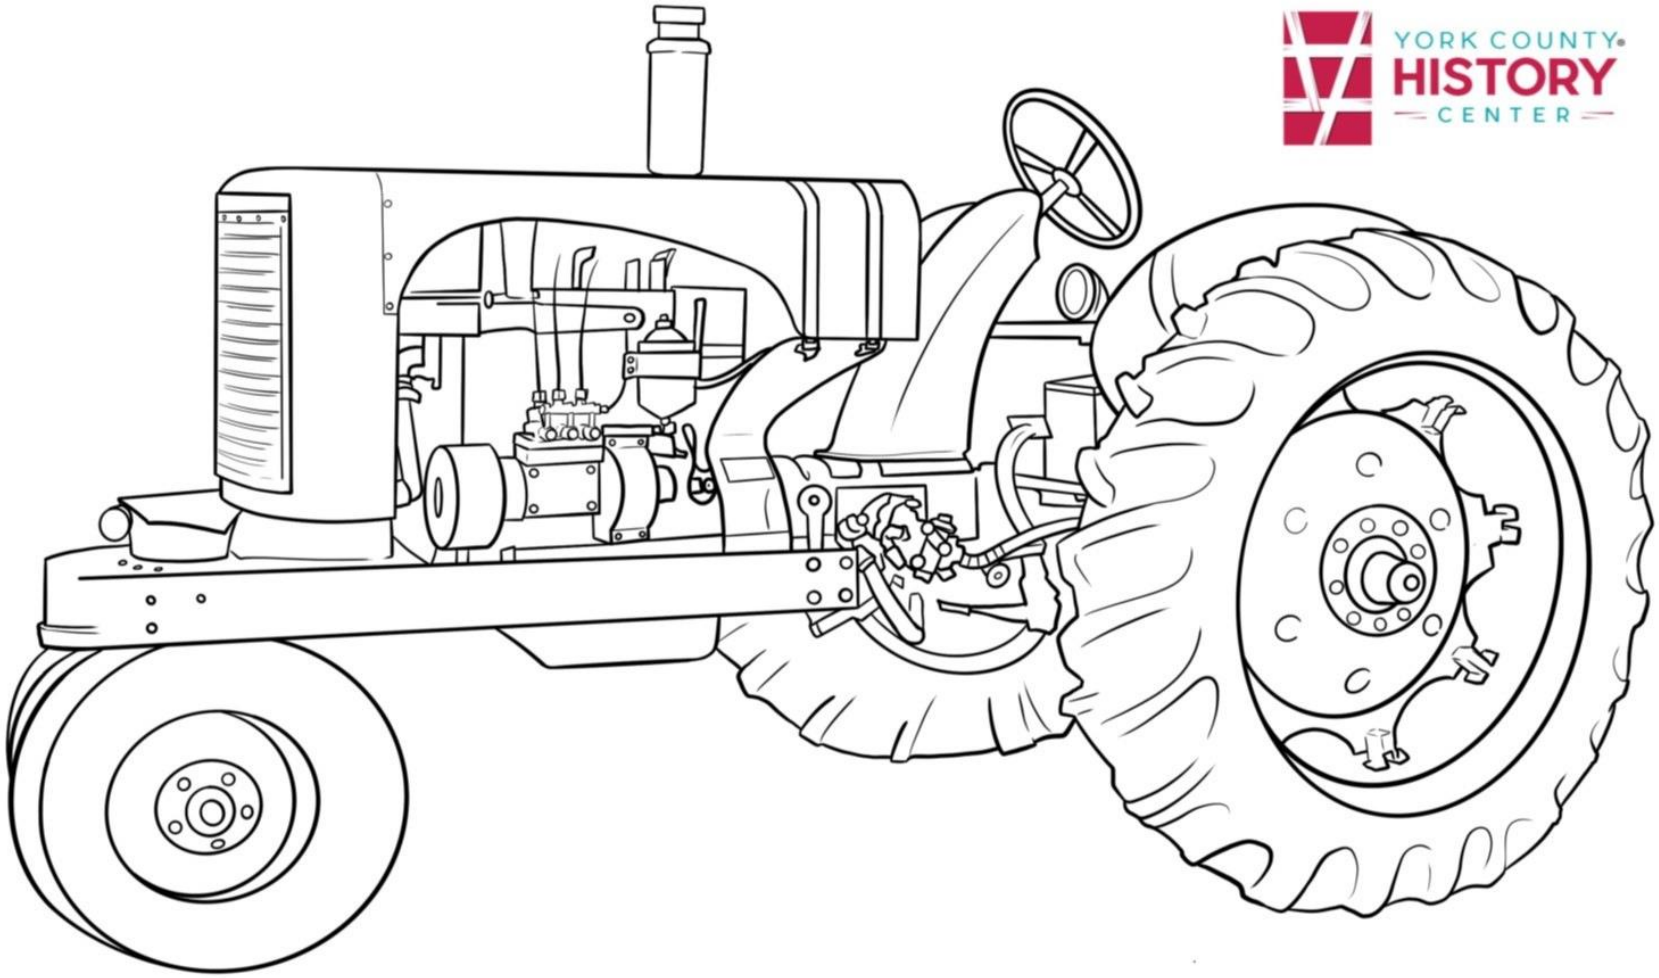


Created in 1926, power companies used Reddy Kilowatt to advertise their product: Electricity! You can see Reddy at the Agricultural and Industrial Museum.



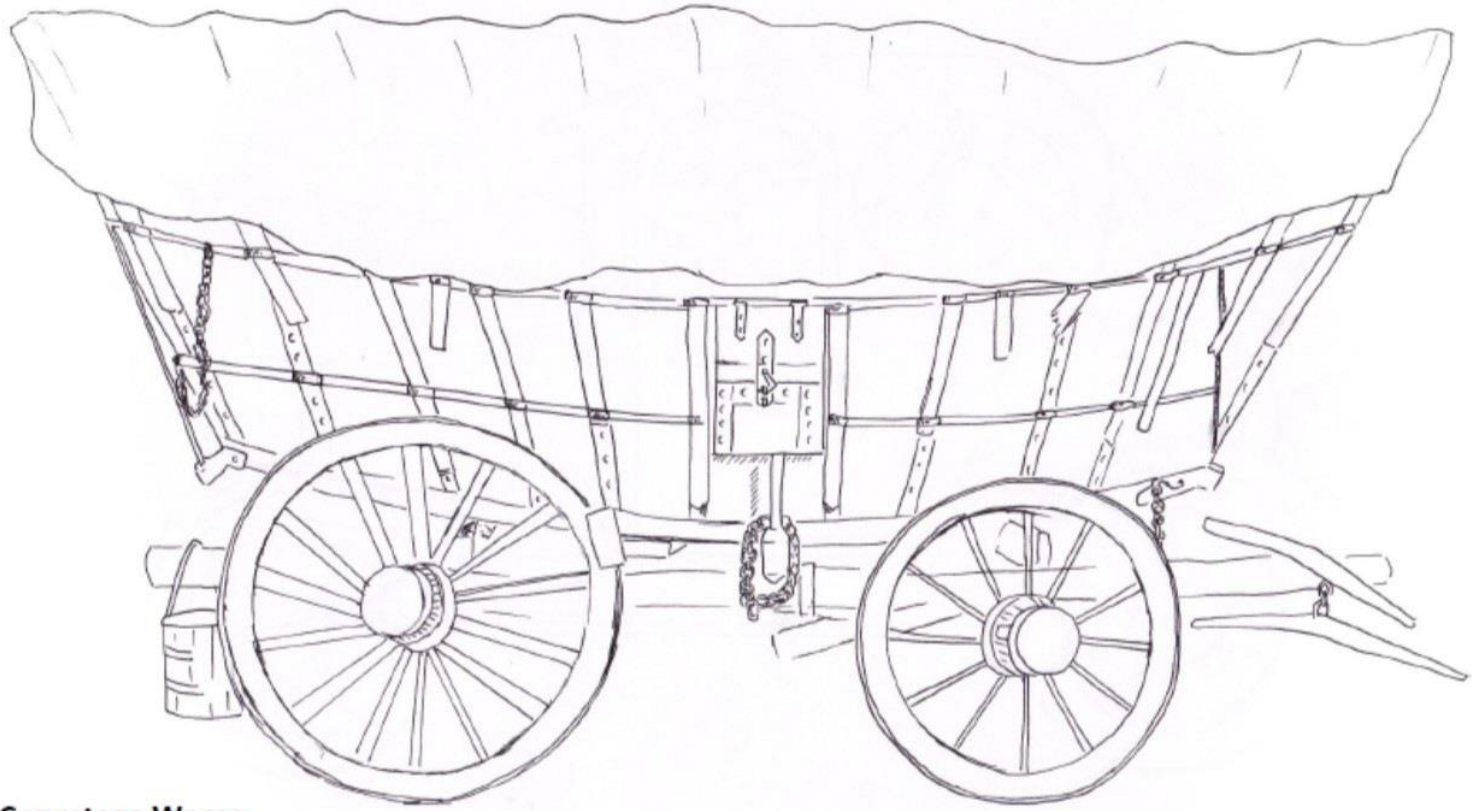
York Manufacturing Company built this A-Frame Ammonia Compressor in 1904. This machine used a chemical reaction to make large blocks of ice that were used to keep meat cold. Visit the Agricultural and Industrial Museum to learn more.

YORK COUNTY HISTORY CENTER



1951 Sheppard Diesel Farm Tractor Model SD-3

The R.H. Sheppard Company of Hanover made tractors from 1949 to 1956. Though these tractors are now very old people still like to collect them, drive them in parades, and sometimes still use them on their farms. This one can be seen at the Agricultural and Industrial Museum.



Conestoga Wagon

These wagons were used during the 1700s-1800s to move goods and supplies over rough roads. They could hold up to six tons! Four to Six strong horses pulled the wagon. It's curved bottom kept the goods inside from shifting and the cover protected them from wet weather.

Haines Shoehouse

The Haines Shoe House is a shoe-shaped house in Hellam Township, PA about two miles west of the borough of Hallam, on Shoe House Road near Route 30.

The house was built by shoe salesman Mahlon Haines in 1948 as a form of advertisement. You can still visit the Shoehouse as it is open seasonally for tours and as an ice cream shop.
